

Bomb Technician anti-fragment vest **Art.-No.: 170011**

(Made in Germany)

This vest was especially designed according to requirements of bomb technicians to be used when manipulating critical objects. Special features are the high collar and the cuff like elongation of the upper arms, by leaving the elbows open to the rear. This design gives maximum protection to the threat facing front side without limiting flexibility or reach of the lower arms and hands.

Protection class: FT; TNO, STANAG 2920
492 m/s

Outer vest: Cordura®, mixed textile
Colour: Black

Size according to customer requirements.

Specifications are subject to change without notice!
