

„Special Operation Search Kit“ Art.-No.: 170029/30

ALLEN  VANGUARD™

The Special Operations Search kit complements the Allen-Vanguard SO range of equipment and the HAL® Special Operations kit in particular.

The kit described has been designed with help of British Armed Forces and Police search personnel. All the equipment is contained in a specially designed backpack that offers a comfortable ergonomic design combined with the practicality of equipment storage. The backpack has also been designed to allow for extra free space allowing search personnel to insert some of their own personal equipment if required.

For freight movement and stowage of the main backpack and all ancillary equipment, an additional hardened air transport case is available upon request.

Content:
