

## EOD miniature inspection kit

**Art.- No.: 170476**

ALLEN VANGUARD™

The set includes two battery handles and a range of interchangeable light probes with diameters as small as 3 mm and mirrors with diameters as small as 5 mm. Light probes can be assembled up to 760 mm length and include flex and stay models and insulated light guides for use in electrical equipment.

A selection of miniature mirrors and light probes to assist in the internal inspection of suspect cases and containers through small apertures with the minimum of disturbance. Suitable for EOR/EOD, security and scene of crime search.

The kit is supplied in protective foam lined carrying case with batteries and spare lamps.

**Kit content:**

Model: VIP22
