

## X-Ray- "Special" case SWAT-Application

Following repeated requests about firing the GOLDEN-X-ray generators in a silent motion, we decided to design these special carrying cases for SWAT-Applications only.

The carrying cases are foam clad and customised for the three types of X-Ray generators, including the mounted battery.

Triggering the generator may be via trigger cable or – if available – via individual radio control.

The foam cladding will decrease the operational sound of the generator down to near silence.

<p><b>Art.-No: 150151-35</b> <b>Case SEK-XR150</b></p> 	<p><b>Art.-No.: 150150-35</b> <b>Case SEK-XR200</b></p> 	<p><b>Art.-No.: 150192-35</b> <b>Case SEK-XRS 3</b></p> 
--	---	---

### **ATTENTION:**

**Operation of the X-ray generators inside these carrying cases does not comply with national or European Health- and Safety regulations.**

**Deployment is only legitimated by the very special circumstances of SWAT-operations.**
