

Collimator Cap Filters for Golden Engineering X-Ray Generators XR-200 and XRS-3 Art.-No.: 150150-70, 150192-70

In some applications, it may be desirable or required to limit the radiation output angle or to utilize filters to reduce the amount of "soft" radiation.

These filter kits have been developed to satisfy such requirements.

Please note that due to the different internal design of the two X-Ray Generators, only the copper-filters may be swapped between Models.

Kits contents:

XR-200, Art.-No.: 150150-70:

- 30° Collimator clip
- 20° Collimator clip
- Rectangle window Collimator clip
- Copper Filter, 10 mm
- Copper Filter, 30 mm

XRS-3, Art.-No.: 150192-70:

- 30° Collimator clip
- 20° Collimator clip
- Rectangle window Collimator clip
- Copper Filter, 10 mm
- Copper Filter, 30 mm
