

PackBotEOD **X-ray functionality** **Image plate holder**

Holder kit „1 plate“
vertical/horizontal
Art.-No.: 150197-22

Holder Kit „2 plates“
vertical/horizontal
Art.-No.: 150197-23

The image plate holder consists of hardened flexible steel backing plate and permanently glued on image plate envelopes. In order to enable positioning the plate in narrow spaces the holder a hinge device is mounted along one side.

The hinge construction consists of two holders mounted to the backing plate and a connecting axle piece. The ROV gripper holds which opens via three tool-less clamping screws and unfolds over the axle. The holder comes as kit for vertical and horizontal applications.
