

X-ray generator mounts for PackBotEOD

Art.-No.: 160268-121/122

Art.-No.: 160268-122

X-ray generator mount XR 150

This generator mount will be fitted to the toolbar. Two ball retaining bolts hold the mount in axial position.

The XR150 generator is mounted and fixed by a standard video-tripod screw integrated in the to side of the mount.

The generator will be triggered by the autonomous radio controlled trigger device Art.-Nr.: 150151-50

Art.-No.: 160268-121

X-ray generator mount 200/XRS3

This generator mount will be fitted to the toolbar. Two ball retaining bolts hold the mount in axial position.

Generators XR 200 or XRS-3 are fitted to the mount via the existing tripod mount fixture on the generator. The top end of the mount fits into the generator clip-fixture.

By pushing the holding pin on the base plate the generator can be fitted or released.

The generator will be triggered by the autonomous radio controlled trigger device Art.-Nr.: 150150-50/ 150192-50
